

Announcing the world's first **IR Portal App!**

For institutional investors worldwide – Provides IR information of Japanese stocks in English

“JAPAN IR Street” - Discovery of Valuable Japanese Stocks

FinanTec Co., Ltd. (Head office: Chuo-ku, Tokyo; CEO: Masaki Kai) has started offering at no cost an IR app called JAPAN IR Street for iOS devices. Institutional investors worldwide can use this app to receive IR information from Japanese companies in Japanese and English. Japan IR Street is the world's first IR portal app. FinanTec has been operating IR Street, Japan's largest IR portal site, since 2000. This website distributes IR information from its listed companies in Japanese and English to institutional investors around the world. Individuals in Japan use this website, too. Now, FinanTec has advanced one more step by developing JAPAN IR Street, an app version of the IR Street website.

We know Global institutional investors are often on the road. With this app, you can access the latest IR information of Japanese companies from anywhere in the world. As a result, this IR portal app serves as a stewardship code platform positioned between Japanese companies and the world's institutional investors.

Foreign investors are currently the largest holders of Japanese stocks. Also, institutional investors have accepted the stewardship code in Japan, which is part of the Abenomics growth strategy. Their interest in Japanese stocks continues to increase, in part because of the higher stock weighting of the Government Pension Investment Fund. However, foreign investors are concerned about the inequality of Japanese and English-language IR information of Japanese companies. This is a significant issue concerning the willingness of foreign investors to buy Japanese equities. This IR portal app could solve this issue.

Many listed companies in Japan place their IR information on Japan IR Street. With this IR app, investors worldwide can view this information at any time from any location. We believe this added convenience will help further invigorate Japan's stock markets. We intend to enhance Japanese IR activity for foreign investors by the support of usage of this IR portal app. You can request IR information which you are interested in companies not being on app yet.

【Features of JAPAN IR Street 】

App Store → Finance or IR Street
